2010 Albuquerque EYH Conference

Saturday, April 3 8am – 1pm

Central New Mexico Community College

technical career workshops for young women grades 6-12

Motivating young women in science and mathematics

fun for students and adults!

For Students

Here is your chance to meet with woman professionals from the community who have found satisfying careers in law, mathematics, engineering, computing, medicine, and other non-traditional technical careers. Middle and high school girls attend three workshops, each led by a professional who shares an aspect of their technical field through a hands-on activity. Workshops typically have 10 to 15 students, facilitating interaction between the presenter and students.

For Educators and Counselors

Here is your chance to attend the Santa Fe Community College course STEM 115, STEM-focused Team-based Design: Team-based activities to engage under-represented females and minorities into STEM-based careers. Attendees may receive 1 CEC credit-hour (with 6-8 hours of remaining course available online).

For Other Adults

Here is your chance to find out more about such topics as academic college preparation, paying for college, and keeping girls interested in science and math. These workshops are designed for parents and educators. Adult participation is optional, but adults must register to attend workshops. Adults are not permitted to attend student workshops.
